

ZIHUI YAO

(619) 953-9947 • ziyao@ucsd.edu • La Jolla, CA

EDUCATION

University of California, San Diego

M.S. in Business Analytics (MSBA)

La Jolla, CA

Jul. 2025 – Jun. 2026

- Coursework: SQL, Predictive Modeling, Business Analytics in Marketing & Finance, AI-Assisted Programming

Dalian University, International College

B.M. in Accounting | GPA: 90.74% (Top 1%)

Dalian, China

Sep. 2021 – Jun. 2025

- National Scholarship (Top 0.2%, 2024); First-Class Scholarship (Top 5%, 2022 & 2023)

WORK EXPERIENCE

JD.com Inc. – Retail Business Unit

Data Analyst Intern

Beijing, China

Jul. 2024 – Aug. 2024

- Reduced internal query response time by ~40% by deploying an AI-powered RAG pipeline integrating 3 LLMs and proprietary knowledge bases
- Built a predictive pricing model on 2,000+ Airbnb listings using feature engineering and regression to support leasing strategy and pricing decisions
- Surfaced top demand drivers via SQL-based EDA and correlation analysis, increasing model accuracy and supporting product team pricing decisions

Changjiang Securities – Wuhan Hanyang Avenue Branch

Finance & Analytics Intern

Wuhan, China

Dec. 2023 – Feb. 2024

- Authored 5+ investment research reports using DuPont decomposition and ratio analysis to support portfolio decision-making for senior stakeholders
- Modeled asset structure, cash flow, and profitability across multiple clients to identify investment risk signals and inform strategic recommendations

National Housing Consulting – Real Estate Appraisal Dept.

Accounting Intern

Shenzhen, China

Nov. 2024 – Dec. 2024

- Verified financial accuracy for multi-million RMB real estate portfolios and drafted appraisal reports supporting M&A transactions and mortgage valuations

PROJECTS

Realtor.com × UCSD MSBA Capstone – Growth Analytics & Bid Optimization

Mar. 2025 – Present

Business Analytics Lead | Python · SQL · Tableau · Apple Search Ads API | Sponsor: Realtor.com (Move, Inc.)

- Improved campaign targeting through a 4-tier keyword segmentation framework built on 2+ years of SQL-based campaign and user journey analysis
- Reduced optimization cycle from 4 weeks to ~5 days by developing early-indicator models predicting long-term revenue from post-install user behaviors
- Designed A/B testing framework for bid strategy optimization; built Tableau dashboard with cohort tracking, contribution analysis, and what-if scenario modeling

Prefabricated Food Industry – Consumer Demand Study

Nov. 2023 – May 2024

Python · SQL · Regression · K-Means Clustering

- Identified 3 consumer segments and quantified addressable market from 500+ survey responses; insights adopted as the basis for go-to-market strategy presented to stakeholders

Campus Second-Hand Trading Platform

Oct. 2022 – Oct. 2023

Founder & Group Leader | Innovation & Entrepreneurship Program

- Grew transaction volume by launching a campus C2C marketplace with data-driven acquisition strategies; won 1st Prize at 'Innovation Cup' (2023) and 3rd Prize at 'Internet+' (2022)
